

FIRST HOUSE MEET - A REPORT

SESSION 2026-2027

The inaugural House Meet of the 2026-2027 academic session was formally convened on April 10, 2026, marking a significant commencement to the school's co-curricular calendar. Students assembled at their designated house venues with a sense of purpose and discipline, ready to integrate into their respective teams. The session was presided over by the Teacher

in-charges of the four houses—**Indian, Pacific, Atlantic, and Arctic**—who facilitated a comprehensive orientation for both new and returning members. This gathering served as a vital platform for establishing the house culture and fostering a collective identity among the student body.

During the proceedings, the in-charges delivered detailed presentations regarding the foundational pillars of their houses.

A primary focus was placed on articulating the **Motto** and **Deeds**, which define the ethical framework and the standards of excellence expected throughout the year.

Furthermore, students were introduced to their respective **House symbols and colours**, with educators providing an in-depth explanation of the history and significance behind these emblems. This helped the students understand that their house identity extends beyond mere competition, representing a commitment to character building and mutual support.

The meeting also provided an opportunity for students to interact with their house mentors and peer leaders, ensuring a clear understanding of the upcoming inter-house schedule. By defining

these roles and expectations early in the session, the House Meet successfully instilled a sense of responsibility and healthy

camaraderie. The session concluded with a briefing on upcoming events, leaving the students well-informed and motivated to contribute meaningfully to their house's legacy over the coming months.
