

SPECIAL CLASS ASSEMBLY BY EYP 2A- A REPORT

The talented students of EYP 2-A presented a delightful and meaningful class assembly titled **'The Rainbow Fish'** on Wednesday, 10th September 2025. Designed to be both engaging and educational, the assembly used interactive storytelling to highlight the values of teamwork, kindness, and sharing.

The event began with a prayer, seeking the blessings of the Almighty. Through their performance, the students conveyed a powerful message: sharing brings happiness not just to others, but to oneself as well. The assembly also shed light on the importance of conserving marine life and introduced the young audience to **Sustainable Development Goal 14 – Life Below Water**.

At the heart of the story was the Rainbow Fish, a striking character adorned with shimmering scales of myriad hues. Believing herself to be superior, she initially refuses to share her beauty with others. However, an unexpected turn of events leads her to realize the value of generosity. When the Rainbow Fish finds herself in trouble, it is the very fish she once ignored who come to her aid—teaching her, and the audience, a heartfelt lesson about kindness and community.

The skit concluded with a vibrant dance performance to the song *"Rainbow Fish,"* perfectly capturing the spirit of the story. This was followed by a lively and thought-provoking question-and-answer session that encouraged audience participation.

The assembly ended on a patriotic note, with all the children joining together to sing the National Anthem with pride and enthusiasm.
